Rubbermaid Commercial Cleaning Products and Equipment

RUBBERMAID MICROFIBRE PRODUCTS ARE SPLIT MICROFIBRE

Not all microfibre products are created equal. At the heart of microfibre is the fibre itself. The term technically applies to fibre that is 1.0 denier or smaller. Splitting is a process that increases the surface area of the fibre by creating microscopic hooks, which enhance microfibre's dust and dirt holding ability.

EMPLOYEE SAFETY IS IMPORTANT

It is a fact that cleaning staff in South Africa and across the world, work with equipment and in conditions that is hazardous to their health and makes them prone to injuries to the back etc. By using the Rubbermaid cleaning range, you can feel safe in the fact that you are giving your employees the best, safest equipment possible.

- ✓ Our microfibre system is 75% lighter than traditional cleaning equipment.
- ✓ All the products are designed in such a way that you do not need to bend down to use them, such as the Velcro mop system.
- ✓ Handles are ergonomically designed to help employees avoid injuries & strains.

REDUCING CLEANING TIME

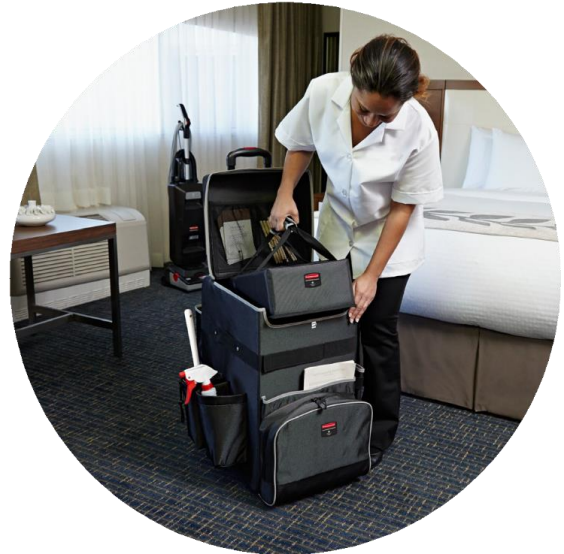

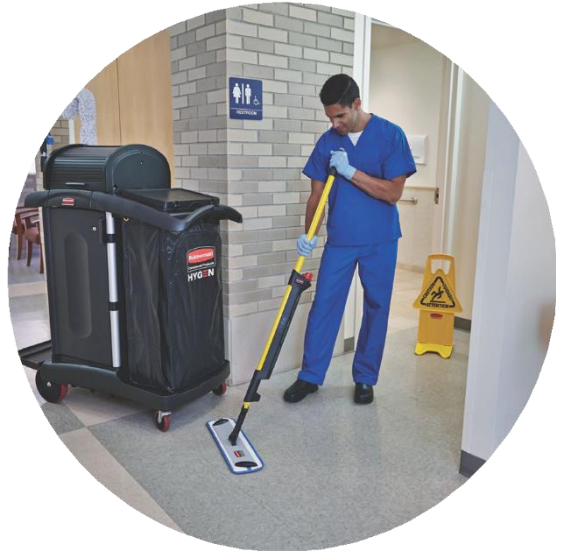

We all know that time is money, help your cleaners work faster with Rubbermaid products.

- ✓ The Rubbermaid cleaning tools allow cleaners to work faster than ever before.
- ✓ The pulse mop™ has shown to be 50% faster than a traditional mop and bucket.
- ✓ Split microfibre works faster and better than any other microfibre, making the cleaners work easier and faster.
